Introduction

Welcome to your Forecast Report

This report shows the astrological trends influencing your life over a period ranging from days to months or years, depending on the time frame used.

The duration of each trend is indicated by a starting date, an ending date and strongest influence date. Further, an influence may begin before the time frame of the report or end beyond it.

The accuracy of the timing of the forecasts is dependent on the accuracy of the birth time. Be prepared to slide the sequence of trends either forwards or backwards in time if necessary. In some instances, there may be interpretations that repeat themselves. This is due to the cyclical and forward and backward motion of the planets activating points on your chart more than once in the period under review.

As you will find, the forecast interpretations can be positive and/or challenging. Their effects can be experienced either directly personally or through events in the lives of others in the environment. Some trends will be more apparent than others, while others may be more subtle. What is most important is how you respond to them.
